

Grupo de Energía de Bogotá, a leading company in providing maintenance for "live wires" in high-impact projects

- *Grupo de Energía de Bogotá is conducting maintenance operations in over 244 km of transmission lines*
- *Our maintenance practices in live wires contribute to increasing the reliability of the Colombian electrical system.*

Bogotá, November 17, 2016. Grupo de Energía de Bogotá is a leading company in the deployment of the "live wire" maintenance technique in high-end transmission projects. This practice seeks to ensure a proper operation of projects while preserving service continuity.

Works on live wires involve not only the maintenance of transmission lines but also a disconnection of the line. Grupo Energía de Bogotá is providing maintenance along 244 km of transmission lines, in the circuits of Guavio- Reforma 1-2, Reforma- Tunal 1-2 and Guavio- Circo 1-2, along with the replacement of 21.822 separators.

This work is increasingly more relevant to ensure quality, reliability and continuity in supplying energy and guaranteeing the service. Apart from the benefit of preventing an energy shortage, this methodology also brings along sizable economic savings and optimization of resources and time for the Group.

Watch this video to know more details about the maintenance procedures for live wires:

About Grupo Energía Bogotá

“Grupo Energía de Bogotá” is one of the leading business groups in the region’s low-emission energy chain. As a Corporate Group, it creates value to its shareholders and interest groups through the sustainable and cost-effective management of business activities throughout the energy chain, both in the generation, transmission, distribution and commercialization of energy and in the transportation and distribution of natural gas.

The Group contributes to the development of the countries where the group operates, while leading projects that impact on the productivity, competitiveness, well-being and quality of life of users.
