

**Bogotá, D.C., July 10, 2017.** With regards to the requirement of information submitted by the Financial Superintendence of Colombia on July 07, 2017, filed under No. 2027080690- 000-000, which states that *"(...)although the information about the non-involvement of Empresa de Energía de Bogotá S.A. E.S.P (EEB) in the arbitration proceeding referred to in the media is clear, after having considered that there is indeed a pending claim against Contugas, a subsidiary of EEB, we kindly request you to report, via the mechanism made available for the provision of relevant information, on the potential financial, economic, legal effects as well as any other impact that might be relevant for the issuer with regards to such a contingency"*, Empresa de Energía de Bogotá S.A. ESP is pleased to inform that the pending claim brought against CONTUGAS was disclosed in the consolidated financial statements of the Company in accordance with the International Financial Reporting Standards - IFRS, which were published as relevant information in the SIMEV dated April 06, 2017 and which can be found on the Company's website using the following link:

### **About Grupo Energía Bogotá**

Grupo Energía de Bogotá (GEB), led by Empresa Energía de Bogotá, is a joint stock company listed in the Colombian Stock Market, whose main purpose is the generation, transmission, distribution and marketing of energy, gas and liquid fuels in all of their forms.

Today, Grupo Energía de Bogotá is the region's main Multi-Latin company of electric energy and natural gas with presence in Colombia, Peru, Guatemala and Brazil. Acting as a "strategic connector", focused on three Business Groups:

- Urban Energy Solutions, seeking to develop and operate the infrastructure needed to meet the demand of electric energy and natural gas of big cities;
- Interconnection for Market Development, business unit in charge of connecting energy generation sources with consumer's megacenters and big users; and
- Low-Emission Generation, seeking new opportunities in renewable energies in countries undergoing a transition from the energy matrix to this sustainable generation low-emission source.
