

Grupo Energía Bogotá will not participate in the Takeover for the acquisition of shares in Gas Natural

December 19, 2017. Pursuant to the information published by Gas Natural Distribución Latinoamérica S.A., in its capacity as controlling company of Gas Natural S.A. E.S.P., today, December 19, 2017, Grupo Energía Bogotá S.A. E.S.P. informs that it is not interested in participating in the Public Offer of Acquisition for the sale of shares of Gas Natural S.A. E.S.P., referred to in section 2.2 of said notice.

Currently, GEB has a share interest of 24.99% in Gas Natural and considers this company a strategic asset and of vital importance for the Business Strategic Group, Urban Energy Solutions, within the framework of the Corporate Strategic Plan (PEC), approved in September 2016.

Grupo Energía Bogotá participates throughout the energy chain and contributes to the development of the countries where it operates, leading projects that impact productivity and competitiveness in the territories to support efficiently and responsibly the growth in the demand of energy and natural gas.

About Grupo Energía Bogotá

Grupo Energía Bogotá (GEB), is a joint stock company, listed in the Stock Exchange Market of Colombia, which main corporate purpose is the generation, transmission, distribution and commercialization of energy, gas and liquid fuels in all of their forms.

Currently, Grupo Energía Bogotá is main Multi-Latin electric energy and natural gas company of the region with presence in Colombia, Peru, Guatemala and Brazil. EEB acts like a "strategic connector", focusing in three Business Groups:

- Urban Energy Solutions, which seeks to develop and operate the necessary infrastructure to meet the demand of electric energy and natural gas of large cities.
- Interconnection for Market Development, is a line of business responsible for connecting sources of energy generation with mega consumption centers and large users; and
- Low Emission Generation that seeks new opportunities in renewable energy in countries that are undergoing the transition of the energy matrix to this source of sustainable generation and low emission.
